FREE HIGH SCHOOLS.

The Free High Schools of our town during the year have been under the instruction of Mr. L. H. Ford and we are pleased to report their uniform success. The value of this class of instruction we believe is too well appreciated for extended consideration in this report.

In conclusion we would say that it seemed best to make a radical change in the text of the reports of the individual schools. While the vast majority of the teachers deserve praise for their work in the schools, they have in years past we think received a sufficient amount of that, and it is a well understood fact that Whitefield has all that could be desired in the way of a well qualified and efficient teaching force. This report is made for the benefit of the tax payer; that he may know what becomes of the money he pays for the support of the common schools; that he may know the number of pupils who are being benefited, how well they attend school, the length of terms, and what it costs to maintain them. In view of these facts we have made this report on such lines.

We desire to call the attention of citizens, and others interested, to the marked decrease in the school population of our town. Our schools grow smaller and smaller until the time has come where in several districts it is impossible to establish a legal school. The pupils thus deprived of school privileges must receive attention. The question is as to how this can be best accomplished. We can see no other remedy other than by transportation. But if funds are not provided, this is difficult to accomplish, unless parents are willing to provide means for their scholars to reach the nearest school. The limit of distance of transportation and the methods of providing for the same are questions for careful consideration. Furthermore they should be settled as far as possible in town meeting and not thrown entirely upon the school committee.

We desire to call the attention of the town to the fact that more money should be raised for the repairs of school buildings. We do not believe it economy to allow them to go unpainted or otherwise in need of repairs.

The appropriation for text books should be the same as in previous years.

Respectfully submitted,

ARTHUR L. SUKEFORTH, *Supt.*

FREE HIGH SCHOOL.

Our Free High Schools have not been so largely attended as in former years, but the attendance has been large enough to make a good school. We have had first class teachers and the schools have been a success. This is the most profitable way in which our school money is expended.

Our common schools have, with one exception, been taught by teachers living in town. The fact that we employ the same teachers, term after term; that many of our teachers are employed, and many more have an opportunity to be employed in other towns is a sufficient recommendation as to their qualifications and success in school work. Nearly all have been experienced teachers and all have given good satisfaction. It seemed best to your Supt. to employ a teacher from out of town for Cooper's Mills school, a thoroughly competent and experienced teacher was employed who maintained the best discipline and taught a good school.

Of the teachers of limited experience Mamie B. Cookson taught the Wheeler school, and Clara E. Tibbetts the Choate school. Each was interested in her school and did good work.

Maurice L. Reilly another of our young teachers taught at Keye's Corner. Mr. Reilly is naturally a teacher, having both the tact to govern and a happy faculty of imparting instruction.

Our other teachers are too well known to need special mention. If all will bear in mind that our schools are for the benefit of the Scholars instead of the teachers, some of the criticisms of the Supt. in his selection of teachers will not be made.

It is the duty of parents to know what the teachers are doing. Visit the school, invite the teacher to your home, take an interest in her work and both teacher and scholars will do better work. Your teachers are willing to work and anxious to succeed. If your scholars are doing well do not hesitate to tell the teacher. She likes to feel that she is appreciated.

Our appropriations for repairs of school buildings and text books should not be less than last year and more will be money well expended.

Respectfully submitted,

L. H. FORD, Supt.
